## DHI Field Technician

**Eastern Wisconsin DHIC** is seeking a full time individual to perform field technician duties along with DHI program support to current members. Individuals will qualify for employee benefits offered by Eastern Wisconsin DHIC.

Candidates should have experience in the agriculture community, computer knowledge and good communication skills to work with the members. The candidate should be located within Brown or Manitowoc County allowing for servicing of members in our northern market area.

If you wish to apply, please send a resume and completed employment application to Glenn Schmahl [gschmahl@ewdhic.org](mailto:gschmahl@ewdhic.org) or Jean Tegen [jean@ewdhic.org](mailto:jean@ewdhic.org). Please feel free to contact us at 920-528-8942 or 920-682-5972 if you have questions about the position. Applications will be accepted until the end of May.

## Looking for Lab Technicians

**Co-DairyLytics** is seeking two individuals to assist in the daily lab procedures at the Waldo site. Candidates should have experience in the agriculture community and willing to work with other individuals within the lab environment. If you wish to apply, please send resume to Glenn Schmahl [gschmahl@ewdhic.org](mailto:gschmahl@ewdhic.org) or Dona Winter [dwinter@codairylytics.com](mailto:dwinter@codairylytics.com). Also, for more details on hours and responsibility feel free to contact us at 920-528-8942 about the positions. Applications will be accepted until May 15, 2017.

## Brancel Hopes All Farmers Sign Up for the Census

MADISON – A lot has changed in the last five years since 2012 when the last Census of Agriculture was taken. That's why Wisconsin Department of Agriculture, Trade and Consumer Protection Secretary Ben Brancel hopes that all farmers will sign up to receive this year's 2017 Census.

"The Census is the only source of uniform, comprehensive and impartial agricultural data in the nation," explains Brancel. "Census data really shows Americans how significant agriculture is to the country and the world, providing food, fuel and fiber for all of us."

It is important for farms of all sizes and from all segments of agriculture to complete the Census. A farm is any place from which at least \$1,000 of agricultural products were produced and sold, or normally would have been sold, during the census year. Even small plots of land in rural or urban areas that grow fruit, vegetables or food animals may qualify.

Data is collected on land use, operator characteristics, production practices and more. The 2017 Census of

Agriculture will include new questions about military veteran status and expanded questions about marketing food directly to consumers.

"Census data is used by local governments, agribusinesses, ag lenders, state leaders and federal officials," said Brancel. "Accurate data allows us all to make informed decisions when forming farm policies and planning budgets for the future."

Sign up for the Census at [www.agcensus.usda.gov](http://www.agcensus.usda.gov) by June 30. Census forms will be mailed to farmers in December. Farmers will be able to complete the Census by mail or on the internet. The online form will be more user-friendly in 2017, automatically calculating totals and skipping questions that are not pertinent.

For more information, call the National Agricultural Statistics Service at (888) 424-7828.

Wisconsin Department of Agriculture, Trade & Consumer Protection

## SHARE YOUR LOVE OF THE FAIR ~ 2017 Fairest of the Fair Applications Available Now!

Please apply now to become the next Sheboygan County Fairest of the Fair and serve as the official hostess and ambassador for the Fair. This is your chance to be a leader and promote all the neat opportunities you've experienced while at the Fair. Take the next step your personal development, apply today and be prepared to strengthen your communication skills and build your resume.

All individuals 18 years of age as of January 1, 2017 and either a resident of Sheboygan County or a member in good standing in a 4-H Club or FFA Chapter of Sheboygan County are welcome to apply. Applications are available on-line at the Fair website [www.shebcofair.com](http://www.shebcofair.com), the Fair office or Extension office. More information can also be found at the Sheboygan County Fairest of the Fair Facebook page. **The deadline to apply is Monday, May 1<sup>st</sup>, 2017.**

**Also, mark your calendars now for the 2017 Fairest of the Fair Gala to be held on Monday, June 12th at 7:00 p.m. Laack's Ballroom in Johnsonville.**

## What's Standing Alfalfa Worth in 2017?<sup>1</sup>

One of the challenges in coming up with a value for standing hay is the lack of established market price information like corn and soybeans. Another challenge is multiple cuttings of hay versus a single harvest for grains. So it's no wonder the price for standing hay can vary greatly between farms, even between fields. Here's one approach for pricing standing hay in 2017.

Assuming four ton dry matter (DM)/acre for the entire year of dairy quality alfalfa hay worth \$100 to \$150/ton baled (\$0.06 to \$0.09/lb DM), half the value is credited to the owner for input costs (land, taxes, seed, chemical and fertilizer), and half the value is credited to the buyer for harvesting, field loss and weather risk. Obviously, estimated yield is an important factor when negotiating price. This formula will help determine pre-season maximum alfalfa dry matter yield potential... $(0.10 \times \text{stems}/\text{ft}^2) + 0.38$ . Actual yield will likely be lower due environmental conditions and individual harvest/management practices. Wait until stems are at least 4-6 inches tall and count only stems upright enough to be cut by the mower.

Using yield distribution based on recent multi-year UW-Extension field research in NE WI for a three cut (43% / 31% / 26%) or four cut (36% / 25% / 21% / 18%) harvest system, the following price range (rounded to the nearest \$5) may offer a starting point for buyers and sellers to negotiate a sale of good to premium quality standing alfalfa in 2017:

	<u>4 cuts</u>	<u>3 cuts</u>
1st crop...	\$ 85-130/a	\$100-155/a
2nd crop...	\$ 60- 90/a	\$ 70-110/a
3rd crop...	\$ 50- 75/a	\$ 60- 95/a
4th crop...	\$ 40- 65/a	

In this example, the standing value for the entire alfalfa field could range from \$230 to \$360/acre for the entire growing season. Keep in mind ownership costs can run \$300-400/acre when the seller considers lost rent, establishment costs and top-dress fertilizer to maintain soil fertility. That's why the same price is not always the right price for everyone. Ultimately, a fair price is whatever a willing seller and an able buyer can agree to.

To help farmers and landowners better evaluate their pricing options, Greg Blonde, UW-Extension Agriculture Agent developed a mobile app for pricing standing hay. With more than 1500 downloads and 600 users across the country, the app provides quick access to baled hay market prices for reference calculations, with value per acre by cutting displayed using annual yield and harvest cost projections. The Android app is free to download at the Google Play store (search for **Hay Pricing**) or by going to: <https://play.google.com/store/apps/details?id=com.smartmapsconsulting.haypricing>

<sup>1</sup>Greg Blonde, Waupaca County UW-Extension Agent. April 2017.

## MyAgSource Core. (The version that's FREE.)

You'll find essential animal data for your everyday needs, including individual cow lookup, laboratory diagnostic results, a herd performance overview comparing current test to previous test as well as bulk tank contribution.

Monitor month-to-month performance changes in your herd on your MyAgSource Home Page. Green, red or yellow highlights indicate whether performance is above, below or the same as the month before. This helps you quickly:

- Identify which reports and graphs to look at first
- Assess 20 Key Management Metrics
- Visually recognize changes

**Benchmarking** - MyAgSource benchmarking feature allows you to compare your performance against 80th percentile herds of your size or the metrics you choose.

**Sign up is available at [www.myagsource.com](http://www.myagsource.com)! Try it Today! Remember it's FREE!**

# STAYING HEALTHY WHILE WORKING ON A FARM

Human health is related to the health of animals and the environment. For example, some diseases can be shared between animals and people. These are called zoonotic diseases. When working on a farm, it is common for germs (e.g., *Salmonella*, *E. coli*, or *Campylobacter*) to pass from animals to people. For this reason, it is important to follow good hygiene practices to protect yourself and your family.

## HOW CAN I PROTECT MYSELF AND MY FAMILY?

- Always wash hands thoroughly with soap and water after touching or working with livestock, handling equipment used on animals, or coming into contact with anything in the area where there are animals.
  - This is especially important to do before preparing or consuming food or drink for yourself or others.
- Use separate shoes, work gloves, and clothing when working with livestock.
  - Either keep these items outside of your home, or change immediately when you get home, in order to keep your home environment free of germs.
  - Change or take off soiled clothing and boots before getting into your vehicles. Wash hands after taking off any clothes and shoes you wore while working with livestock.
- Do not eat or drink in areas where livestock are present.
- Do not drink unpasteurized (raw) milk or serve it to others.
- Make sure to supervise small children when they spend time with animals and discourage behaviors that can increase their risk of getting sick.
- When caring for calves with diarrhea (scours), it is especially important to practice good hygiene and biosecurity. This will help prevent the spread of potential germs between calves as well as reduce the chances you, your coworkers, and your family members could become sick.
  - Young children and immune-compromised persons should not have contact with calves, especially those with diarrhea (scours).
- If you do become sick with diarrhea lasting more than a few days or develop a high fever, contact your health care provider and tell them that you work with livestock.
- Work with your veterinarian to keep your livestock healthy.
