“Milk Pregnancy Testing Facts”

Facts of the test

- The test measures pregnancy-associated glycoprotein (PAGs) to determine the status of the cow. The PAGs are released by the placenta during pregnancy; PAGs are specific to pregnancy unlike some other indicators.
- There is a rapid increase in early PAG levels. PAG levels decline slightly until somewhere around day 60 before returning to high levels before calving.
- These proteins do take time to disappear from the milk so a waiting period of 60 days after calving is recommended to allow for proteins to disappear.
- PAGS are detectable at 28 days post breeding until dry off in the milk sample.
- This test will determine if PAGs are present but cannot determine where the cow is in its gestation period.
- The test has a high level of accuracy (98%) on its results.
- The test is able to use the same preserved milk sample as it uses for component testing.

Tips for a successful milk pregnancy program

- Using it as a confirmation type test
- Understanding results will be reported back as pregnant, open or recheck.
- Recheck results should be verified by the herd veterinarian or by retesting at a later date.
- Herd breeding records should be accurate and up-to-date.
- Minimize any sampler or meter carryover

Cost of milk pregnancy is \$4.25 per sample and results can be emailed or mailed to the dairy.

Eastern Wisconsin D.H.I.C. and the Scholarship Fund of Manitowoc County D.H.I.A.

makes available \$5,000.00 each year for students continuing their education in the agriculture field. Please encourage any students you may know to apply for these scholarships. We have had years that there were not enough applicants and the money was not awarded to any individuals. All scholarships and eligibility information is available at our website www.ewdhic.org. Application deadline is February 15. If you have any further questions feel free to call 920-528-8942.

Enrollment Continues for the Conservation Reserve Enhancement Program

Enrollment into the Conservation Reserve Enhancement Program (CREP) continues at the Farm Service Agency (FSA). CREP is a special type of CRP program that is tailored to environmentally sensitive acreages.

Eligible land will be automatically accepted into the program at the highest FSA determined payment rate for the offered land, provided acreage caps have not been met, the participant and acreage are determined eligible and the requested practice is needed and practical for the offered acreage. Eligible practices include grass and tree buffer strips, grass waterways and wetland restorations. Contracts are 15 years in duration, with limited exceptions. The CREP program does not require that the acreage be open to the public.

Eligible land must have an acceptable cropping history between 2008 and 2013 and must have been owned or operated for at least 12 months at the time of application. Crops planted for harvest in 2018 can be continued through harvest with the CREP contract starting on the first of the month following the harvest of the crop. CREP contracts can be initiated no sooner than 6 months before the contract start date.

Financial assistance for buffer strips and grass waterways include annual payments between \$105 and \$314 per acre in Calumet County and between \$108 and \$322 per acre in Manitowoc County for the life of the contract. The payment rate is determined by the established payment rate per acre for the three predominant soil types of the offered acreage. Cost-share assistance to establish the practice is available on up to 50% of the eligible costs to establish the new planting along with a practice incentive payment of 40% of the eligible costs and a State of Wisconsin incentive payment of 20% of the eligible

costs. In addition, an enrollment incentive payment of \$100 per acre is available as well as State of Wisconsin incentive payments that equal for each acre enrolled 1.5 times the basic rental rate per acre for 15-year agreements and 12 times the basic rental rate per acre for permanent easements. Financial assistance for wetland restorations is the same as above except annual payment rates are between \$125 and \$373 per acre in Calumet County and between \$128 and \$382 per acre in Manitowoc County and the \$100 per acre incentive payment is not applicable.

The Calumet and Manitowoc County land conservation departments have made available websites that show potential CREP eligible areas. These sites are meant for informational purposes and do not guarantee whether an area is eligible or ineligible for enrollment. Anyone with questions about the County web information should contact either the Calumet County Land Conservation Department at 920-849-1442 or the Manitowoc County Land Conservation Department at 920-683-4163.

The Calumet County information is available at:
<http://calumet.maps.arcgis.com/apps/webappviewer/index.html?id=eeaedc2821314a9c8dbc7b56fe8b7179>

The Manitowoc County information is available at:
<http://manitowoc.maps.arcgis.com/apps/View/index.html?appid=84a5bbb046804c559fc9cd13e91b2d49&extent=-88.0916,43.8998,-87.2126,44.3518>

Persons who would like more information about CREP should contact their local FSA office. In Calumet County, please contact the Chilton FSA Office at 920-849-3570, ext. 2 and in Manitowoc County, please contact the Manitowoc FSA Office at 920-683-5119, ext. 2.

Scholarship Opportunity

The Wisconsin State Fair Dairy Promotion Board is offering \$1,000 scholarships to be used during the second semester of the 2018-19 school year.

Third and fourth-year college students pursuing dairy-related or food science degrees at one of Wisconsin's four-year universities are eligible to apply. Additional scholarships will be available to high school seniors planning to pursue a dairy-related or food science degree at one of Wisconsin's four-year universities or students studying in a two-year, technical school program related to dairy or food science.

Applicants will be evaluated on involvement and leadership in dairy-related activities, scholastic achievement, and career objectives. Finalists will be interviewed in mid-April, with the recipients to be recognized at the 2018 Wisconsin State Fair.

The application is available at <http://wistatefair.com/competitions/dairy-promo-board/>.

Application deadline is Friday, March 23.

For more information, contact Katy Katzman at 262-903-6727 or katzman@idcnet.com.

Benefits May Be Available to Area Producers that Suffered Livestock Deaths or Honeybee Losses Due to the Excessive Cold

Livestock Deaths- Producers who lost qualifying livestock due to the continuing and excessively cold weather may be eligible for assistance from the Livestock Indemnity Program (LIP).

LIP compensates livestock owners and contract growers for livestock death losses in excess of normal mortality due to an eligible adverse weather event, including losses due to floods, blizzards, disease, wildfires, extreme heat and extreme cold.

LIP program rules require that a notice of loss be filed with FSA within 30 days of when the loss of livestock is apparent. Livestock that die within 60 days of the date of the qualifying loss will be considered eligible for loss benefits.

The LIP national payment rate for eligible livestock owners is based on 75 percent of the average fair market value of the livestock as determined by FSA.

Producers must provide supporting evidence, including documentation of animal numbers prior to the disaster

and the number and kind of livestock that died, supplemented by records to document the loss, purchase records, veterinarian records, production records and other similar documents.

Honeybee Losses- Honeybee producers who lost bees due to the extreme cold over the past couple of weeks may be eligible for assistance from the Emergency Livestock Assistance Program (ELAP).

Eligible losses must be able to be documented. Producers who suffered a honeybee loss due to the extreme cold must file a notice of loss with their Farm Service Agency office within 30 calendar days of when the loss became apparent.

Producers who lost animals or honeybees due to the excessively cold weather should immediately contact their FSA office. Producers in Calumet County should contact the Chilton FSA office at 920-849-3570, ext. 2 and producers in Manitowoc County they should contact the Manitowoc FSA office at 920-683-5119, ext. 2 with any questions or program eligibility requirements.

2018 PESTICIDE APPLICATOR TRAINING

DATE: Tuesday, February 27, 2018

TIME: 9:30 AM - 2:30 PM (This includes time for the exam) — Registration at 9:15 AM

LOCATION: Manitowoc County Office Complex, Room 300, 4319 Expo Drive, Manitowoc, WI 54221-0935

COST: \$30.00 (manual and certification)

Lunch will be on your own. Please pick up the manual and make payment by no later than February 20th. Call 683-4169 with questions.

Wisconsin State Fair Century & Sesquicentennial Farm & Home Applications Now Available

Applications are now available for the **2018 Century and Sesquicentennial Farm and Home Award**, a prestigious award given to families who have dedicated their life to Wisconsin farming for 100 or 150 years.

To qualify for the award, families are required to provide proof of continuous family ownership of a property in the state of Wisconsin for either the last 100 or 150 years. All property owners will be honored at a special **Century and Sesquicentennial Farm and Home Award Program** held in conjunction with the 2018 Wisconsin State Fair.

The Century Farm and Home Program began in 1948 in conjunction with the State of Wisconsin's Centennial Celebration. There are over **9,200 Century Farms and**

Homes nestled throughout the Badger State. The Sesquicentennial Program similarly originated in 1998 as part of the State's Sesquicentennial Celebration and has since honored more than **780** families.

Applications for the Century and Sesquicentennial Farm and Home Award are available now and must be postmarked by the application deadline, **March 1, 2018**. Applications are not available online and only one certificate may be issued per property.

To request a copy of either application, contact Jill Albanese, Director of Competitive Exhibits, at 414-777-0580, or write to: Century or Sesquicentennial Farm & Home Program: 640 S. 84th Street, West Allis, WI 53214.

Calf Bedding Materials for Winter

It is time to change winter bedding and bring out the calf jackets to provide calves extra warmth for low temperatures.

If you normally use shavings as calf bedding during summer, it is now time to switch to straw bedding to help keep calves warm. Michigan State University Extension recommends using straw bedding when temperatures are 40° Fahrenheit or below. Straw bedding is ideal when daytime highs or night time lows are below the thermo-neutral zone for a young calf. A newborn Holstein calf has to burn energy to keep herself warm when temperatures are below 50°F. If there is draft, wet bedding, or an immune system challenge, then the critical temperature is higher.

A calf is born with only two to four percent of body weight as fat, which will not last long if she is forced to burn fat for heat production. Burning body fat for heat can lead to lower growth rates, compromised immune status, and even death. The need for straw bedding at this time of the year to provide warmth for young calves is true both in barns and in hutches. Unless the calf barn has supplemental heat, it should be well ventilated, but without drafts on the calf, and within 5° of outside temperatures, necessitating the use of straw bedding and calf jackets.

Straw is the best choice of bedding to provide thermal insulation for the young calf. Straw tends to hold moisture, so it is important to add fresh bedding regularly. Moisture exceeding 20 percent is too high. If you kneel with all your weight in the calf bedding, any moisture on your pants indicates the bedding is too wet. Straw should be bedded deep enough that the calf can nestle in. This traps warm air around the calf, which will help maintain body heat. For winter months, the straw should be deep enough that when the calf is lying down its legs are generally not visible.

Calf jackets are another way to protect calves from losing excess body heat. A field trial from North Dakota State University found that calves housed in hutches during winter had higher average daily gains when wearing calf jackets. Gains for jacketed calves averaged 1.15 pounds per day for the first three weeks of life, while calves without jackets averaged 0.82 pounds per day. When using calf jackets, ensure that they are sized correctly and stay dry.

The use of deep straw bedding and calf jackets during low temperatures will help young calves stay warm resulting in improved average daily gains and immune status.

Do You Have Enough Bedding?

For the winter months, “a calf can stand a good deal of cold weather if it is dry and protected from drafts” (Agriculture Experiment Station Circular, July 1931). Bedding is a key component for winter calf management, providing a good base to soak up in liquid, provide insulation, and allow nesting. It is recommended to have a minimum 20-25 pounds of bedding per calf to start, and add two to three pound additional per day.

Nest Score 1
Legs are entirely visible
when lying down.

Nest Score 2
Legs are partially visible
when lying down.

Nest Score 3
Legs are not visible
when lying down.

Your calves can tell you a lot whether or not you have enough bedding. In the winter time, the goal is to have a Nesting Score 3, which provided enough bedding to cover the calf's legs, and allow it to burrow on those cold winter days!

How Much Feed Do I Have?

With the end of the year quickly approaching, it is a good time to develop your balance sheet which includes feed inventories. Balance sheets give a snapshot in time of where your farm is financially, and they should be completed the same time each year. What better time than the end of the year! Included in the balance sheet is feed inventory. So, how much feed do you have on inventory?

When it comes to bunker silos, the amount of feed present can vary tremendously due to the amount of compaction that was applied, or not applied, to any particular site/structure. The corn silage and haylage calculations to the right are based on averages of 42 lbs/ft³ and 32 lbs/ft³, respectively. Unfortunately, the range for corn silage can be from 22 lbs/ft³ to 67 lbs/ft³, while haylage generally ranges from 9 lbs/ft³ to 32 lbs/ft³. Remember this is an estimate, it is meant to help us reach an acceptable range without actually weighing every load we remove from the structure. When in doubt, use the average values provided.

Silo bags have been popular for years, but especially when we have extra forage, as they allow us the ability to expand our storage capacity without making a capital investment. You can see the estimated values for the amount of forage contained in "1 foot" of length in a bag depending on the diameter. The amount of horsepower at the PTO while bagging, the rate the wagons were emptied, the moisture at the time of ensiling, etc., all have an impact on the final densities of the silo bag.

The calculations to the right gives you a reasonable idea of what a producer could expect given one of them know the size of the bag they are working with.

Remember, when you purchase a 200' bag, you had to tie off both ends when it was finished, so, you may only have 184' or so that is actually filled.

Source: Kevin Jarek, Extension Agriculture Agent in the Outagamie Agriculture Report, November 2017

Corn Silage

Length x Width x Height x 42 lbs/ft³ *

Divided by 2000 = tons of 65% corn silage

*This value can vary from 22 lbs to 67 lbs/ft³ depending on compaction

Haylage

Length x Width x Height x 17 lbs/ft³ **

Divided by 2000 = tons of dry hay equivalent

** This value can vary from 9 lbs to 32 lbs/ft³ depending on compaction

Silo Bag Calculations

For 8 Foot Diameter Bag

| | |
|-------------------|---------------------------------|
| Haylage | 0.38 tons dry hay equivalent |
| Corn Silage | 0.95 tons/ft of 65% corn silage |
| Ground ear corn | 26.5 bu/ft |
| Ground shell corn | 34 bu/ft |

For 9 Foot Diameter Bag

| | |
|-------------------|--------------------------------|
| Haylage | 0.44 tons dry hay equivalent |
| Corn Silage | 1.1 tons/ft of 65% corn silage |
| Ground ear corn | 26.5 bu/ft |
| Ground shell corn | 42 bu/ft |

For 10 Foot Diameter Bag

| | |
|-------------------|--------------------------------------|
| Haylage | 0.54 tons dry hay equivalent |
| Corn Silage | 1.35 tons per ft. of 65% corn silage |
| Ground ear corn | 32.6 bu/ft |
| Ground shell corn | 51.7 bu/ft |

For 12 Foot Diameter Bag

| | |
|-------------------|---------------------------------|
| Haylage | 0.85 tons dry hay equivalent |
| Corn Silage | 2.1 tons per ft 65% corn silage |
| Ground ear corn | 46.9 bu/ft |
| Ground shell corn | 74.45 bu/ft |

** According to a 1997 bunker silo density study done by UW-Extension located on BTM.

Farmer to Farmer Mentoring

Winter 2018 Sessions

Topics: Cover Crops and Reduced/ No-Till Systems

Join us each month to hear how area producers and their agronomists are making cover crops and reduced/no-till systems work on their farm. Hear their stories on the successes and challenges. These sessions will be informal with open dialogue. Refreshments and snacks will be provided. No cost to attend.

January 23rd, 2018, 10am– 12pm -Bruce Riesterer & Shawn Eckstein, Eckstein Agronomics LLC

Bruce Riesterer and his family run a cash cropping operation in Manitowoc and Calumet Counties. The Riesterer's have been using no-till planting methods and cover crops on their cropland since 2011. The Riesterer's work with Shawn Eckstein, the Owner/Agronomist of Eckstein Agronomics LLC. Join us to hear their story...

Location: Manitowoc County Office Complex Room 300, 4319 Expo Drive, Manitowoc, WI

February 8th, 2018, 10am– 12pm - Dan Meyer, Dan Meyer Family Farm & Matt Rataczak, NRCS

Dan Meyer and his family run a 150 cow dairy operation in Southern Manitowoc County. The Meyer's first started to implement no-till and cover cropping practices on their land 10 years ago. Today, they operate their land 100% no-till and use cover crops whenever possible. Matt Rataczak, NRCS, will be present to share his knowledge on cover cropping and tillage practices and also provide information on federal cost share programs that may be available for your farm. Join us to hear their story...

Location: Kiel Fish and Game Lodge, 22721 Fish and Game Road, Kiel, WI

March 1st, 2018, 10am– 12pm - Joe Heyroth, Schoner-Hugel Farms LLC

Joe Heyroth, in partnership with farm members, Tom and Richard, operate a 100 cow dairy operation near Mishicot. The Heyroth's first started incorporating cover crops into their cropping systems in 2010 and have been using no-till practices since the early 1990's. The Heyroth's work with Galen Schaufnagel, an Agronomist with County Visions. Join us to hear his story...

Location: Two Creeks Town Hall, 5128 Tapawingo Road, Two Rivers, WI

March 29th, 2018, 10am– 12pm - Jim Fitzgerald, Soaring Eagle Dairy LLC & Steve Hoffman, InDepth Agronomy

Jim Fitzgerald and his family run a 1,150 cow dairy operation in central Manitowoc County. The Fitzgerald's use both no-till and minimum tillage practices on their cropland and currently have 400 acres planted in cover crops. The Fitzgerald's work with Steve Hoffman, the Owner/Agronomist of InDepth Agronomy. Join us to hear their story...

Location: Soaring Eagle Dairy, 7407 CTH F, Newton, WI

Please RSVP no later than one week prior to each session by contacting Danielle Block:
Danielleblock@co.manitowoc.wi.us or 920-683-4906

Event Sponsored By:

About the 2018 Agronomy Day

Sharpening the pencil to analyze the cost of crop production is more important than ever with commodity prices at or below production costs. Plan to spend the day learning about which agronomic practices have the greatest probability for a profitable return.

Learn about advances made to help manage white mold, mycotoxins in corn silage and winter wheat diseases. When is there an economic return to using fungicides in our cropping systems?

Have weather patterns really changed? What does the Wisconsin climatological data tell us?

Lastly, marketing and risk management need to be a major focus. Have your marketing plans and pricing objectives been determined? What marketing tools may help you reach your price targets? What are corn and soybean ending stocks telling us about supply and demand and prices for 2018?

Thanks to our industry sponsors for their support of this educational program.

Plan to attend an informative and enjoyable day.

2018 Agronomy Day

Thursday, February 22, 2018 – 10:00 am – 3:00 pm
Five Pillars Restaurant, Random Lake

University of Wisconsin-Extension

REGISTRATION FORM

10:00 am - Registration/Coffee Welcome

1:00 pm - Tweaking Soybean Production Practices

10:30 am - Managing Crop Diseases

- Managing White Mold with Cultural Practices and Fungicides
- Corn Disease Updates:
 - Timing Fungicide Applications to Reduce Mycotoxins in Corn Silage
 - Managing Winter Wheat Diseases in Eastern WI

Untangling the Key Factors That Impact Soybean Yields

- Does Applying N to Soybeans Increase Yields
- Can Strip Tillage Work Effectively for Soybeans at the door.

Shawn Conley
UW-Madison/UW-Extension Soybean Specialist

CCA Credits Applied For

Name (s) _____

Address _____

1:30 pm - Has the Weather Really Changed?

- Does Wisconsin Weather Data Support Common Perceptions That Weather Patterns are Changing
- A Look Back 50 Years

Damon Smith
UW-Madison/UW-Extension Plant Pathologist

11:30 am - What's New in Ag-Products and Services?

Industry Representatives

Ed Hopkins
PhD, Assistant Wisconsin State Climatologist

12:00 pm - Lunch

Sponsored in part by your farm supply businesses

2:45 pm - Market Outlooks for 2018

- Grain Carry Out Projections - Market Outlooks
- Strategies for Marketing in the Year Ahead

Naomi Blohm
Senior Market Advisor, Stewart Peterson Group

3:00 pm - Adjourn

Please make _____ reservation(s) for the 2018 **Agronomy Day Program**. Reservations due by February 19, 2018.

Cost: \$5.00/person. Please make checks payable to: **Sheboygan County UW-Extension**. You may pay at the door.

2018 Soil Health & Cover Crop Forum

March 13th, 2018 from 9:00AM to 3:30PM

Knox's Silver Valley Banquet Hall
1222 S. Alverno Road-Manitowoc WI 54220

Agenda

- 9:00 AM Registration
9:50 AM Introduction
Amanda Cordova, Manitowoc Co. Soil & Water Conservation Department
10:00 AM Soil Health Goals & Costs Associated in Achieving Them
Matt Rataczak, District Conservationist, NRCS
10:30 AM Investigating Cover Crops for No-Till Systems Through On-Farm Research
Stefan Gailans, Research and Field Crops Director, Practical Farmers of Iowa
11:30AM Sponsor Presentations and Lunch
12:45 PM Real-Life Experiences and Challenges with No-Till and Cover Crops
Dan Meyer, Dan Meyer Family Farms
1:15PM Transitioning to Cover Crops and No-Till
TBD
1:45 PM Break
2:00 PM The Lower Fox River Demonstration Networks Update
Brent Petersen, Lower Fox River Demo Farm Manager
2:30PM Benefits of Rotational Grazing and Set-Up Considerations
Adam Abel, Soil Conservationist, NRCS
3:00PM Upcoming Events in Soil Health and Closing Statements
Danielle Block, Manitowoc Co. Soil & Water Conservation Department

Registrations (*after Feb. 26th*) X \$30.00 = _____

Sheboygan County Holstein Association Scholarship

The Sheboygan County Holstein Association is offering a scholarship valued at up to \$500 to a Sheboygan County high school senior enrolling in a post high school agricultural related program.

Eligibility

1. Applicant must be enrolling in a four-year college, one or two year technical school or college short course program in an agricultural-related field.
2. Applicant must have been a member of the Wisconsin Junior Holstein Association and the Sheboygan County Junior Holstein Association for at least two years prior to applying for the scholarship.
3. Applicant must be a high school senior at the time of application.
4. Applicant must be available for an interview if deemed necessary by the Sheboygan County Holstein Association.

Comments

1. All scholarship forms must be received by March 1st in the UW-Extension Office, 5 University Drive, Sheboygan, WI 53081.
2. Scholarships will be paid in the name of the school or the school and the recipient after the first semester is completed. Recipient must inform the Treasurer of the Sheboygan County Holstein Association how the school wants the check made out.
3. If you have any questions regarding this scholarship, contact Kara Abraham at (920) 892-7602.

Applicant Information

(On a separate sheet of paper, please type the following information and answer the questions below in 100 words or less.)

Name _____ Age _____ Date of Birth _____

Address _____

City _____ State _____ Zip Code _____

Parent or Guardian _____ Phone _____

Number of years completed in the 4-H or FFA Dairy Project working with registered Holstein cattle _____

Name and address of the school you will be attending while using this scholarship (payment after first semester completed).

Narrative

1. What are you planning to major in and why?
2. List your most important accomplishments with registered Holstein cattle.
3. List your most important accomplishment outside of the Dairy project.
4. How will your experiences with Holstein cattle play a role in your future? What have you learned from these experiences?
5. What changes do you feel the Sheboygan County Holstein Association could make to better serve the Holstein industry in Sheboygan County?
