Tractor Safety	5-6
Congratulations Fair Exhibitors!	7
Calf Coats	8
Production Index	9-19

Easy Mastitis Test

A low somatic cell count (SCC) can have a significant positive impact on your bottom line. Take a proactive approach to lower the therapeutic use of antibiotics on your farm and make management changes that will reduce the prevalence of mastitis causing organisms. Work with your veterinarian to establish the appropriate treatment protocol for your herd.

CONVENIENT - Use a preserved DHI milk sample to identify mastitis pathogens. Under the right conditions, this test can be done on the same preserved milk samples collected on test day for routine DHI (SCC and components) analysis.

RELIABLE - Polymerase Chain Reaction (PCR) technology is employed to detect strains of bacteria. PCR is a process that replicates DNA to quickly and positively identify pathogens, living or dead.

FAST - The Easy Mastitis Test has an advantage in speed. Once samples are received, results can be made available in two days or less, depending on laboratory volume.

FLEXIBLE - Work with your veterinarian to develop a testing strategy that works best for your herd. Select specific groups or pens of cows, or identify individual animals based on history and SCC thresholds. Producers have the option to send one milk sample from an individual cow or pool samples from multiple cows to determine which organisms are most prevalent.

TARGETED - Identify the probable cause of infection. Easy Mastitis

Test is available in two versions: *Contagious Panel* and *Complete Panel*.

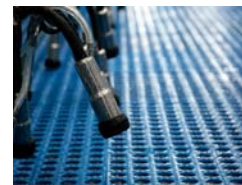

CONTAGIOUS PANEL - Identifies the presence of three major mastitis pathogens commonly referred to as the "contagious pathogens":

1. Staphylococcus aureus
2. Streptococcus agalactiae
3. Mycoplasma bovis

COMPLETE PANEL - Is useful if you've ruled out contagious pathogens. Identifies the following:

1. Staphylococcus aureus
2. Staphylococcus spp. (including all major coagulase-negative staphylococci)
3. Streptococcus agalactiae
4. Streptococcus dysgalactiae
5. Streptococcus uberis
6. Escherichia coli
7. Enterococcus spp. (including E. faecalis and E. faecium)
8. Klebsiella spp. (including K. oxytoca and K. pneumoniae)
9. Serratia marcescens
10. Corynebacterium bovis
11. Arcanobacter pyogenes and Peptoniphilus (Peptostreptococcus) indolicus
12. Staphylococcal β -lactamase gene (penicillin resistance gene)
13. Mycoplasma bovis
14. Mycoplasma spp.
15. Yeast
16. Prototheca spp.

Results from the Complete Panel test can be challenging to interpret. These pathogens can be present in the environment and may or may not be a cause of infection. The report cannot tell you with certainty if the pathogen came from within the udder or if it was simply an external contaminant. Though this test can be conducted on preserved DHI test day samples, aseptic samples are recommended to minimize the presence of external contaminants.

Allflex® Tamperproof™ Eartags offer the foremost security in livestock identification. Allflex® construction, retention and durability plus are made from specially formulated polyurethane that combines flexibility with strength. Every female tag features the exclusive Rotaclip™ inside. The self-piercing tip of an Allflex® male tag locks tight into the Rotaclip™. On entry into the female tag, the male tip forces the exclusive Rotaclip™ to spring open inside. The Rotaclip™ snaps back locking the tag solidly into place, once the tip has fully entered the tag. The hard ridge of the Rotaclip™ and the female's molded ridge doubly secure the tag. The Rotaclip™ allows the female tag to turn on male stem to help prevent snagging.

Note: Premise ID number is required for ALL tag purchases.

Allflex® RFID Tags

CRI is pleased to be able to offer the Official Radio Frequency Identification (RFID) tags for the National Animal Identification System (NAIS). Purchase just an RFID button alone or order a matching set which includes an RFID tag plus matching large visual tags. Each official tag features a unique 15 digit number beginning with 840 plus a large management number that can be customized or left blank. Six different RFID options are available. RFID buttons available only in white. Matching visual tags available in seven different colors - white, yellow, orange, red, pink, green or blue.

Allflex® Non-RFID Tags

Allflex® Tamperproof Ear Tags are also available with non-RFID buttons. These tags feature a unique 15 digit animal identification number plus a large management number that can be customized or left blank. Non-RFID buttons come in the same color as the large visual tags. Large visual tags are available in seven colors: white, yellow, orange, red, pink, green and blue. All Non-RFID combos sold in packages for 10 animals. These are for non-chip reader tags only

Allflex® Eartag Combos

CRI also continues to offer eight different visual tag combos. Every Allflex® Tamperproof™ Eartag visual combo features a large management number that can be customized it fit any farm or ranch's management system. This number incorporates the patented Allflex® Laser Ink Marking that is guaranteed permanent. Underneath the easy to read dark ink overlay, a matching laser number is etched into the surface of each tag to prevent fading. Each tag also includes a AIN (840) number for unique identification.

Identifying Wisconsin™ Branded Tag Program

In July of 2012 Wisconsin Livestock Identification Consortium (WLIC) launched the Identifying Wisconsin™ branded tag program. The voluntary Identifying Wisconsin™ branded Official ID program is the first of its kind and has been developed with support from Wisconsin livestock producers, industry and the Wisconsin Department of Agriculture, Trade and Consumer Protection (DATCP). The Identifying Wisconsin initiative is an independent, industry-funded program dedicated to accurate animal identification and highlights the consumer value and quality of Wisconsin livestock. Under the Identifying Wisconsin program, Wisconsin producers with a premises ID can purchase approved AIN (840) and Premises ID tags and will carry the "Wisconsin Origin" seal that is printed by tag manufacturers and only distributed to farms in the state of Wisconsin through select distributors.

Contact your Eastern Wisconsin Field Tech or the Office (920) 528-8942 for more information.

In recognition of National Farm Safety and Health Week (September 18-24, 2016), Brown County UW-Extension will offer the following webinars.

There is no cost to attend, but please register by contacting Kathy at kathy.dechamps@ces.uwex.edu or 920-391-4653.

*****Free popcorn and soda will be offered*****

Respiratory Protection for Agricultural Producers

Monday, September 19, from 12-1 PM

Ag & Extension Service Center, 1150 Bellevue St., Green Bay

Presenter: Carolyn Sheridan, RN, BSN; Clinical Director, AgriSafe Network

Determining the type of respiratory protection that provides adequate protection from the multiple respiratory hazards in production agriculture can be a difficult process. The Respiratory Protection for Agricultural Producers program will help clarify that process and remove some of the guess work.

- The program will:
- Present an overview of agricultural respiratory exposures.
- Discuss the various types of respiratory protection.
- Discuss appropriate respiratory protection for specific hazards (examples – grain, cotton, hog, cattle, poultry, etc.).
- Review user friendly resources including AgriSafe Networks Respiratory Selection Guide.

Promoting Total Farmer Health

Tuesday, September 20, from 12-1 PM

Ag & Extension Service Center, 1150 Bellevue St., Green Bay

Presenter: Charlotte Halverson, BSN, COHN-S; Occupational Health Nurse, AgriSafe Network

In 2011, the National Institute for Occupational Safety & Health launched the Total Worker Health program. Integrating work-related safety and health practices are founded on research and the belief that successful programs include both employer and employee responsibility and collaboration. In an effort to reduce farm and ranch injuries and illnesses, these worksite principles can be adapted and integrated into agricultural health and safety protocols.

Upon completion of this program, participants will be able to:

1. Define the NIOSH Total Worker Health (TWH) program.
2. Describe at least three essential elements of the Total Worker Health program relative to production agriculture.
3. Identify reliable resources for use in development of a Total Worker Health program for an agricultural operation.

Youth Agricultural Safety: Cultivating a Lasting Legacy

Wednesday, September 21, from 12-1 PM

Lawrence Town Hall (2400 Shady Ct, De Pere)

Presenters:

Bryan Weichelt, PhD, Project Scientist, National Children's Center for Rural and Agricultural Health and Safety

Mark Mews, BS, Vice-president, Financial Strategies of Wisconsin

Cultivating a lasting legacy is something that few do well. Fewer and fewer Americans are donning overalls and work boots to take on the job that their dad, grandpa, and great-grandpa did. Active farm owners are faced with the harsh reality that they may be the last of their line to till the soil, milk the cows, or tend the vines. Transitioning the operation to the next generation is a process that often takes years to be successful, and it also takes years of safeguarding those who are likely to take it on - our children.

At the end of the webinar you will be able to:

1. Identify the benefits and challenges of youth on farms
2. Explore available resources and tools needed keep youth safe on farms
3. Understand key financial planning steps of transitioning a farm operation
4. Understand the potential to establish and leave a positive and lasting legacy

Protecting Young Adults in the Agricultural Workforce

Wednesday, September 21, from 1:30-2:30 PM

Lawrence Town Hall (2400 Shady Ct, De Pere)

Presenter: Charlotte Halverson, BSN, COHN-S; Occupational Health Nurse, AgriSafe Network

At the conclusion of this program, participants will be able to:

1. Identify physical and psychological developmental factors to consider when employing and training young adults in the agricultural sector.
2. Define agricultural hazards and exposures that increase the risk of injury and illness among the young worker.
3. Describe regulatory standards that can promote a safe work environment for young employees.
4. Create action steps that can reduce agricultural injury and illness.

University of Wisconsin, U.S. Department of Agriculture and Wisconsin counties cooperating. An EEO/AA employer, University of Wisconsin Extension provides equal opportunities in employment and programming, including Title IX and American with Disabilities (ADA) requirements.

Do you plan to work on a farm?

Does your son or daughter work on a farm during the summer? Do you hire youth to work for you during the year? Do these young people have adequate safety training?

Accidents cause more deaths to individuals between the ages of 15 and 24 than all other causes combined. To help reduce accidents, a Tractor & Farm Safety Camp is being coordinated by UW-Extension Manitowoc County.

The course focuses on the safety aspects of operating farm equipment and daily farm tasks. To complete the course, youth must attend all sessions and pass a written and a driving exam.

Federal law requires that youth younger than 16 years must be certified before being hired to work with tractors and tractor machinery. Effective May 1, 1996, state law mandated that no person may direct or permit a youth younger than 16 years of age to operate a farm tractor or self-propelled implement on a public road unless the youth has been certified as successfully completing a tractor and machinery certification course. Youth must be the minimum age of 12 by the first day of the Tractor & Farm Safety Camp in order to register.

Teenagers who drive for their parents may still do so without the formal training program as long as they do not operate the tractor on a public road. The law also does not apply to situations where a youth is driving a tractor and implement directly across (perpendicular to) a public road.

If you intend to hire any teenagers on your farm, make sure that they enroll in this course for your protection as well as theirs. There are penalties for not complying with the law. Also, some insurance companies have indicated that, technically, they cannot cover an accident to an untrained youth.

According to the U.S. Department of Labor, farm tractor accidents cause more fatalities than any other type of accident on the farm. Accidents involving farm tractors result in about 270 deaths annually in the U.S.

Don't be a statistic! Get your certification now!

**Tractor & Farm
Safety Camp
November 11-13, 2016**

Held at:
Camp TaPaWingo
915 W. TaPaWingo Road
Mishicot, WI 54228

Sponsored by:

Manitowoc County
Sheboygan County

Tractor & Farm Safety Camp
November 11-13, 2016

Cost: \$195 per person

Registration Deadline:
October 31, 2016

*Includes meals, lodging, all training materials,
and 24 hours of class time.

Open to any youth in Wisconsin

Recommended: six hours of driving practice prior
to attending the course.

Registration forms available at:
manitowoc.uwex.edu

Program Begins: Friday, November 11, 2016

Arrive early on Friday to complete needed
paperwork.

Parent/legal guardian required to attend the first
portion of the class on Friday evening.

Program Ends: Sunday November 13, 2016

Certificates are issued by the Manitowoc County
UW-Extension office following
successful completion of course.

Federal law requires that youth under the age of 16 must be certified before being hired to work with any tractors and tractor machinery. Wisconsin Act 455 mandates any youth under the age of 16 cannot operate a farm tractor or self-propelled farm implement on a public highway unless the youth has been certified as successfully completing this safety training course.
